Address: Maranchey, Malappuram, Kerala, India

Summary

Junior React Developer with hands-on experience building responsive and scalable web applications using React.js, JavaScript (ES6+), Next.js, TypeScript, Tailwind CSS, REST APIs, Axios, Supabase, and Firebase. Experienced in developing reusable components, state management, API integration, authentication, CRUD operations, responsive UI, and database-driven applications. Familiar with React Hooks, React Router, Redux Toolkit, Git, GitHub, and modern frontend development practices. Seeking a Junior React Developer / Frontend Developer opportunity

EDUCATION

BCA Computer Science ▸ Indira Gandhi National Open University(IGNOU), India

Frontend Development ▸ Kerala Steds, Kochi

12th ▸ GHSS Maranchery, Malappuram

10th ▸ GHSS Maranchery, Malappuram

EXPERIENCE/INTERNSHIPS

Sep 2025 – Present

Software Engineer – Front End ▸ Freelance, Malappuram

- Developed responsive web applications using React.js, JavaScript, and Tailwind CSS
- Designed and implemented web applications and 3rd-party software integrations for customer-facing projects.
- Integrated REST APIs using Axios and Fetch API with authentication, pagination, error handling, and dynamic data rendering
- Implemented **CRUD operations, authentication, form handling, API integration, and responsive UI components**
- Implemented reusable UI components and responsive layouts
- Deployed frontend applications using **Vercel and Netlify**

March 2025 – Aug 2025

Software Engineer – Front End/internship ▸Kerala Steds, Kochi

- **Developed frontend applications using React.js and Tailwind CSS**
- Hands-on practice with Node.js
- Identified web-based user interactions and developed highly responsive user interface components via React concepts

- API integration using fetch method
- Built a full-stack web app to collect data from documents

PROJECTS

ShopFlow (E-Commerce Website)

- The project utilises modern technologies such as **Next.js, Supabase, Tailwind CSS, Framer Motion, React Router, Razorpay, and Vercel**
- **Project Link:**https://shop-flow-gray.vercel.app/
- Developed and deployed a fully functional, production-ready e-commerce platform featuring modern UI components and state management.
- Architected a complex relational database schema to handle diverse product variants, including 5 distinct product images, 4 custom sizes, and multi-tiered pricing logic.
- Integrated a secure, industry-standard payment gateway API to support seamless and secure end-to-end user checkout flows.
- Tailwind CSS framework was used for UI designs
- Built full-stack capabilities leveraging serverless backend solutions for efficient data retrieval, order management, and user authentication.
- Optimised web performance and cross-device responsiveness, ensuring fast loading times and robust deployment via Vercel pipelines.

Meal Recipe App

This is a project using HTML, CSS, and JavaScript

- Tech Stack: HTML5, CSS3, JavaScript (ES6+), Fetch API, Netlify
- Developed a comprehensive search engine allowing users to discover recipes by name, ingredients, or category using external REST APIs.
- Engineered dynamic filtering logic to sort through recipe data efficiently on the client-side
- Utilised the Fetch API for asynchronous data retrieval, ensuring a smooth, "no-reload" user experience.
- Built a fully responsive UI from scratch and managed the continuous deployment pipeline via Netlify

FitLife Studio (Gym Website) /CRUD

- The project utilises modern technologies such as HTML5, CSS3, JSX, JavaScript (ES6+) / React.js, Tailwind CSS, Vercel, and authentication
- Project Link: https://fitlife-studio-beta.vercel.app/
- Conceptualised and engineered a premium, feature-rich website for FitLife Studio Gym to digitise member onboarding and fitness tracking.
- Tailwind CSS framework was used for UI designs
- Developed dynamic front-end components to showcase gym schedules, pricing plans, and specialised trainer profiles seamlessly.
- Managed the configuration, continuous integration, and cloud hosting pipeline using Vercel for high availability.
- Tracking dashboard

Technical Skills

Frontend : **React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Context API TypeScript, Redux Toolkit, Component-Based Architecture, Search Engine Optimisation (SEO) React Router, Fetch API, React Hooks, Redux**

Backend & Database: **Node.js, Supabase, Firebase, REST APIs, Web Services, Payment Integration (Razorpay)**

Tools & Platforms: **Git, GitHub, Postman, Vercel, Netlify, Google Cloud, Google Console, Deployments**

AI & Productivity Tools: **GitHub Copilot, Claude AI, ChatGPT (Prompt Engineering for rapid prototyping, debugging optimisation), Replit, v0.vercel**
